Glossophagian or nectar-eating bats use their echo-location system to search for flowers with nectar even in the absence of light. Some flowers only open their petals at night, with the bat being its most important pollinator. This example of a symbiotic reproduction-food relationship is part of the magic that can be observed on a night tour. Like the bat, much of the biodiversity of the rainforest has nocturnal habits.

Their adaptations have allowed them to survive in a world without light, obtaining advantages over their competition for food-gathering, and protecting them from their light-dependent predators. Frogs with charming sounds and colors, sloths, insects, and even snakes can be enjoyed at this wonderful rainforest night party.

Located in the outskirts of the Tenorio River, this one of a kind river awes visitors from around the world with its unique beauty. A circuit trail of 7 kilometers will take us through the forest, to various interesting places, starting with magical Rio Celeste Waterfall, the blue lagoon, a stretch of the calm river that makes a beautiful natural lagoon, followed by the observation deck of the Tenorio Volcano, which offers incredible views of the volcano and the surrounding mountains. Next come two more unbelievable attractions: "Las Ollas" which are fumaroles filled with boiling mud and finally the "Teñideros" or Dyers, which is the place where the river acquires its unique color due to a natural chemical reaction. On the way back we will continue to walk alongside the riverbank, admiring the bubbling waters, the natural hot springs and the incredible scenery that envelopes us. The final highlight of our visit to one of the most popular attractions in Costa Rica will be a delicious hot lunch, before driving back to your hotel.

Well, apparently, they are very happy because nothing stresses them.

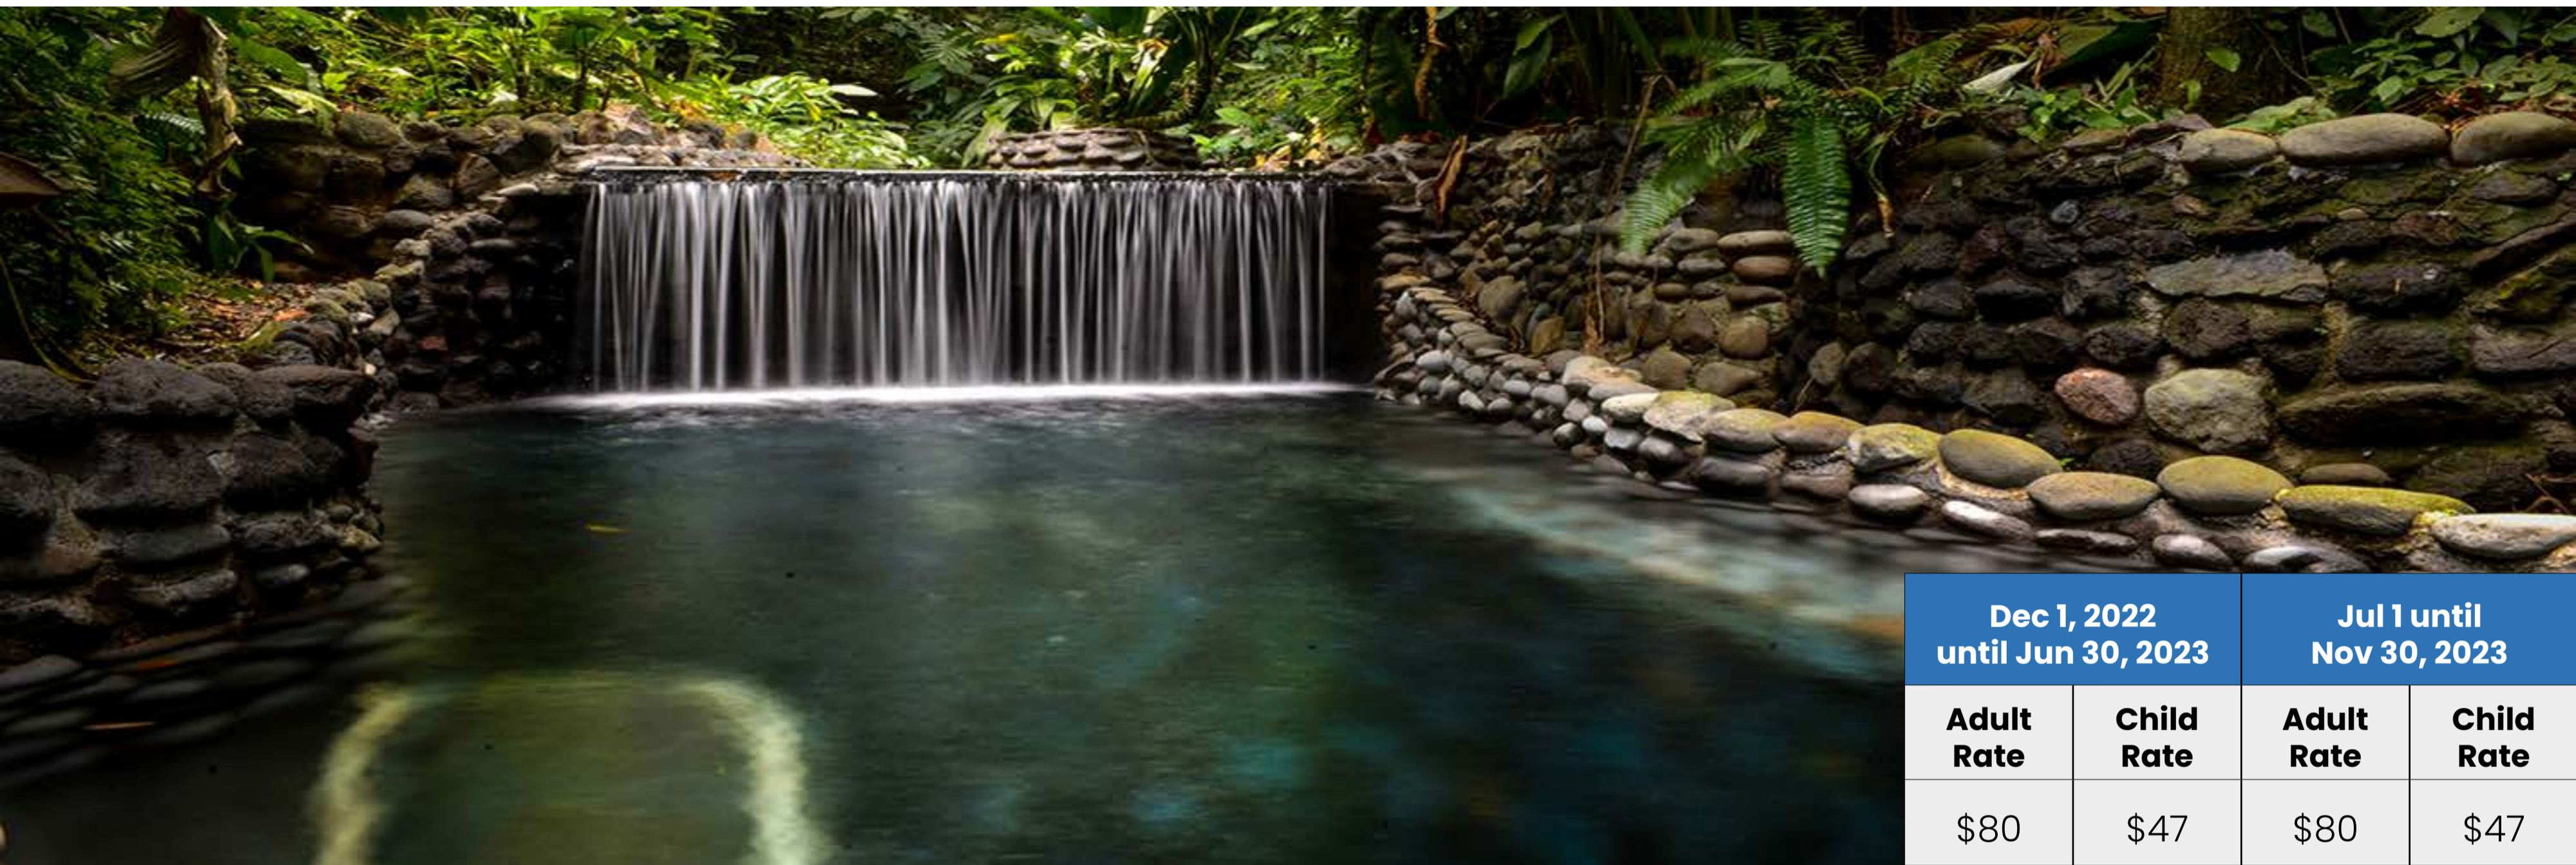

We invite you on a short hike through the secondary forest as we search for them.
